DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 2-9, drawn to the structure of a door handle, classified in 292/336.3

Group 2, claim(s) 10-15, drawn to a lock and key, classified in 70/449 or 70/337

Claim 1 is cancelled. Claim 16 is generic.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires the specific components of the door handle including a finishing moulding, opening button, first and second hooks, a blocking rod and vertical lever. This structure is not required for Group II which is directed at the lock, cylindrical block and bolt with key. The key is then further limited requiring a drum, pins, guiding grooves and functionality of the key. bolt and block is not required by group I.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 3673

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
